Dear Ms. Diamond:

As requested in last Friday's afternoon meeting, I have attached a map that indicates the wells in question regarding aquifer exemptions. There are two lists, the one with 95 wells represents those wells that are injecting into zones specifically denied (this is now in questions based upon the May 28, 1985 letter) in the Primacy application. The second lists of wells are those wells injecting into zones that are non-hydrocarbon producing with water quality less than 3,000 mg/L TDS that we not addressed in the Primacy application. We have reduced the number of wells in the second list to only eleven. If you have any questions, please let me know.

Sincerely,

Robert S. Habel

Technical Services Manager

Division of Oil, Gas, and Geothermal Resources
